

Assignment 2 / INFO212 H24

Mads Ask, Hannah Emilie Bøthun, Stefan Malvin Næss, Aslak Prestvik

Vandvik

Task a)

This diagram represents the process of renting a car from a customer registering to receiving the car keys. It shows the interactions between the customer and the rental company, including registration, selecting a car and insurance, verifying the driver's license, storing payment details, and handling the car handover. It also accounts for cases where the customer doesn't show up, leading to a fee and invoice. The rental company manages customer information and ensures all steps are completed before the rental is finalized

Task b)

Registration	Select car, time and duration
Last updated on Sep 26th '24	Last updated on Sep 26th '24
Name*	Rental location*
Surname*	Return location*
Billing address*	Start time*
Phone number (+47)*	Duration*
Email*	Choose a car
Personal ID*	Select

The registration form shows the process of user registration. The customer is required to fill in their name, surname, billing address, phone number, e-mail and personal ID. The star besides the label indicates that the customer is required to fill in the column, and if they don't fill it in they will get an error message and be asked to try again. They are required because it is crucial information for the car rental service to have about the customers.

In the second form, the user has to fill in the rental location, return location, start time and duration. They also get the option to pick the car of their choice. This is also crucial information for the car rental service to know, because it simply would not work without it.

Pick up car
Last updated on Sep 26th '24
Pick up time*
Choose time to pick up car
Select location for pick up*
Select

This gives the user the ability to choose a time and place for where and when pickup of the car will occur. This will be the time and place for when to pick up the car. The user is required to fill out all of the columns.
