Settle dispute with supplier Financial Manager	80
Amend Request for Quotation Requester Manager	49
Settle dispute with supplier Purchasing Agent	26
Amend Purchase Requisition	11

- As we can see in the screenshot above, “Analyze Request for Quotation” is the most frequent activity, and “Amend Purchase Requisition” is the least.

- The longest case in terms of duration and number of activities

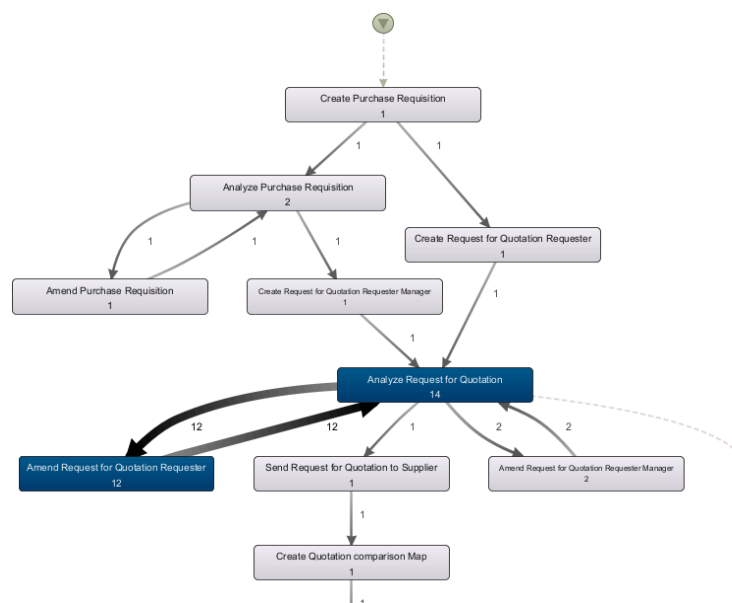

- “Request for quotation” and “deliver goods and services”
- A visualization of case duration based on number of cases

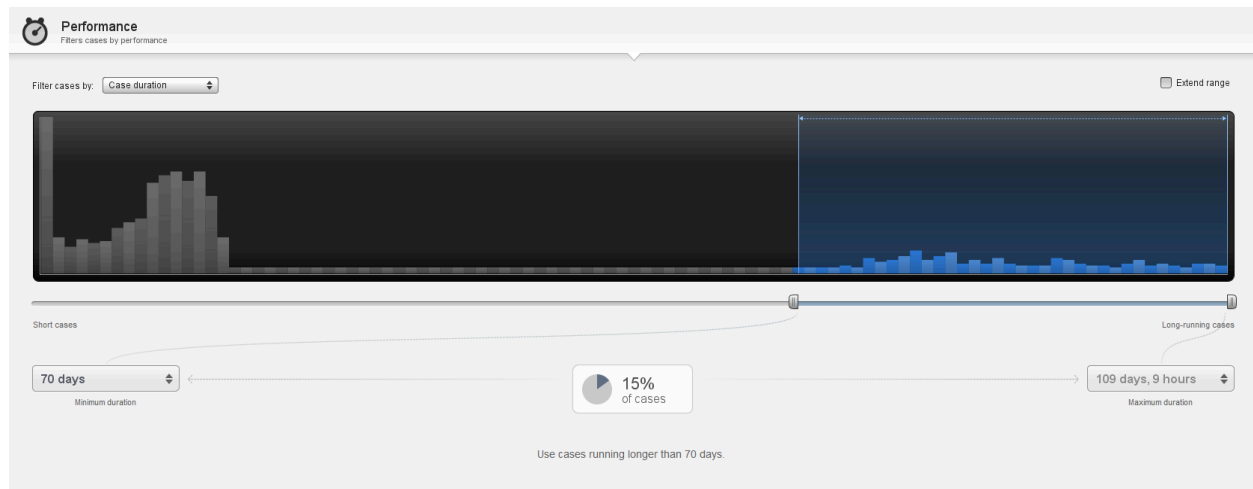

- “Create Purchase Requisition”

❖ Which activity has the maximum number of repetitions in the whole process? What is the total duration of that activity? How do you infer this information from fluxicon Disco?

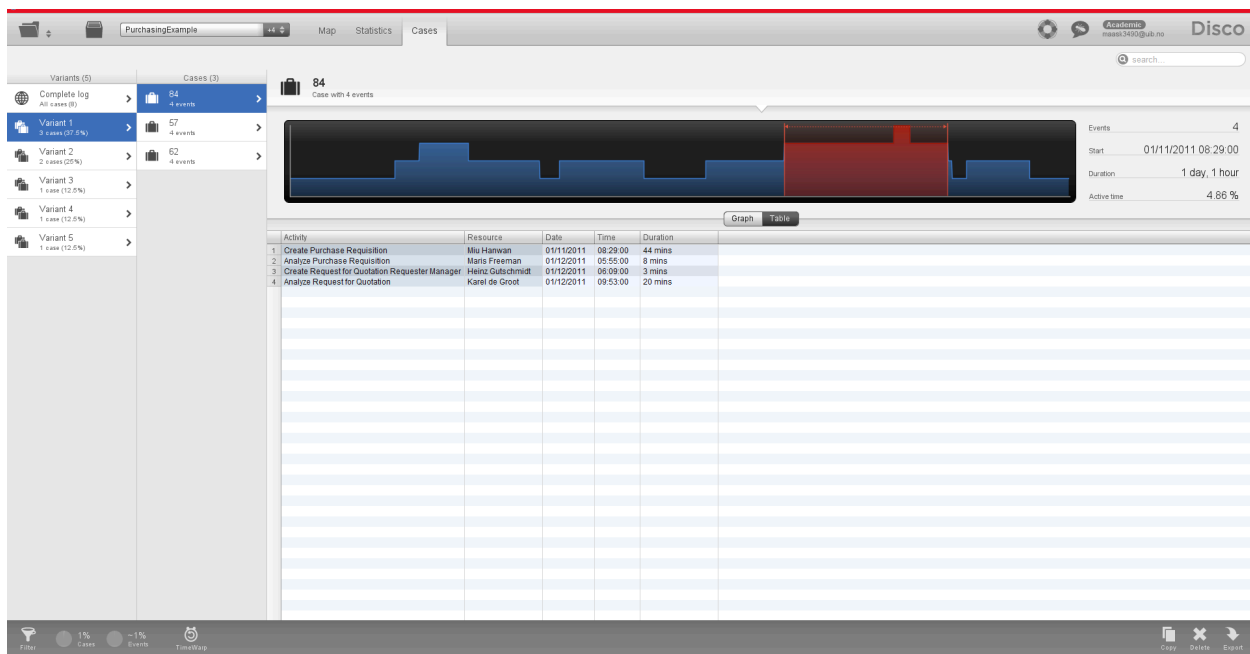

- “Analyze Request for Quotation”

❖ Filter cases by ‘Total waiting time’. Setup 70 days as minimum waiting time. How many percentages of cases do you get after applying this filter?

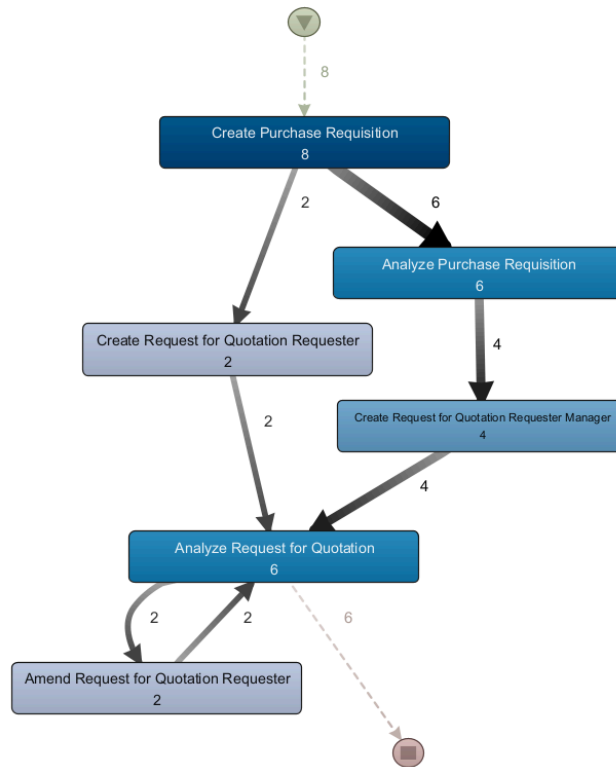

- We get 15% of cases with a minimum waiting time of 70 days

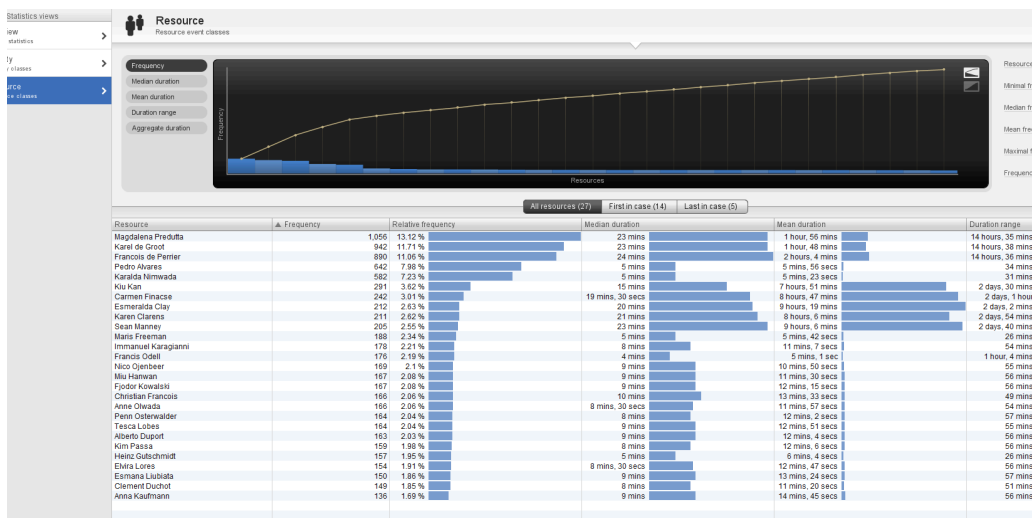

❖ Filter cases by ‘Timeframe’. What is the total number of cases that were handled from January 7th to 14th? Find out the case variant that has the maximum number of cases. How many cases are there in that variant? Use that variant to filter the cases and show the process model after that filter.

- Total number of cases : 8
- The variant with the most cases is variant 1, with 3 cases.

❖ Who among the resources has the highest frequency? Filter only the cases those were handled by that resource.

- Magdalena Predutta has the highest frequency with 1056.
